A Stainless Steel **DEHOOKER**
In EVERY Captain's Bag!

From True Turn: Hooks for every angler Good Fishing!

GA3
True Turn
Hook More Fish!

Daiichi Premium Fishing Hooks

enters back through the fish's mouth to the wrong change of the lip. Bingo! He's hooked. That's why you don't set the hook with circle hooks, or the line rod or reel in the line slowly until the bait begins!

Catch and Release

Because circle hooks wrap around the fish's lip, the hook is exposed for easy removal. Regular "J" hooks tend to hook up farther inside the fish's mouth making releases less longer.
